Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Kikinis (5,532,719).

Regarding claim 1, Kikinis discloses a controller 49 for receiving display control information from a host computer 11, which meets the receiving step as claimed, and an adjustment circuitry 52 for determining and adjusting the aspect ratio of the monitor 53 based on the received display control information (see col. 2, lines 47-51), which meets the determining step as claimed.

Regarding claim 2, the system of Kikinis is intended to use for more than one monitor. When second monitor is used, the position and size controls of Kikinis meet the determining step as claimed.

Regarding claim 3, in column 5, lines 25-32, Kikinis indicates that the picture size and position control information can be in any value. Any variation of the value is considered an intended used of the invention. Kikinis further indicates the user is allowed to adjust the picture height (col. 1, lines 63-66). Hence, the picture size and position control information meet the destination rectangle and the source rectangle information, and the clipping limitations as recited in claims 5-8.

Art Unit: 2622

Regarding claim 9, in addition of rejection to claim 2, Kikinis further teaches that the resolution information of the monitor is used to control the mode operation of the monitor (col. 5, lines 44-55). The mode switching operation meets the determining steps as claimed.

Regarding claim 10, see col. 4, lines 13-17.

Regarding claims 11 and 12, the adjustment circuitry 52 in Kikinis receives the monitor resolution information as indicated in col. 5, lines 44-55, rather it is the first, second, or third monitor.

Regarding claim 13, see col. 4, line 66, through col. 6, line 7.

Regarding claims 14-15, the control information can be changed and updated by the user at any time (col. 4, lines 13-17).

Regarding claim 16, see col. 1, lines 62-66.

Regarding claims 17-33, see the corresponding rejections as set forth above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kaneda et al. (6,864,921) shows a display control unit.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.
